

Acton Nature Center Community Lecture Series

From Cities to Backyards: *How You Can Help Save Migratory Birds*

Sunday, April 12, 2026 2pm
Opal Durant Acton Community Center
6430 Smoky Hill Ct., Granbury, TX

As spring migration approaches, billions of birds are gearing up for one of the most remarkable and dangerous journeys in nature. Join us to explore the critical challenges birds face as they navigate through our urban landscapes. This talk will dive into the major threats to bird populations, specifically light pollution and window collisions (the second leading cause of bird population decline). Most importantly, you will learn practical, effective steps you can take at home to create a safer environment for our feathered travelers. Whether you are a homeowner or a community member, discover how your actions can help sustain our local ecosystems.

Guest Speaker - Mei Ling Liu is the Education Specialist at Texas Conservation Alliance, where she leads community-based conservation initiatives focused on native plant restoration and dark-sky advocacy. She is also a Texas Master Naturalist, Xerces Society Ambassador, and serves on the Wild Ones board. Through these roles, she works to connect the public to environmental stewardship and strengthen cross-sector partnerships that advance long-term conservation impact.
